DETAILED ACTION

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 9/20/06 and 10/12/06 were filed in a timely manner. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Javitt (USPN 5,837,730 hereafter '730).

The '730 patent teaches a method of treating various mental disorders including cocaine related psychosis and schizophrenia (abstract, col. 5, lin. 32-43). The patent teaches a method of treating mental disorders by administering clozapine (col. 7, lin. 14-38). Regarding the increase in serotonin limitation it is the position of the Examiner that such a limitation would inherently be met by the methods taught in the '730 patent, since the only method step is administration. Clozapine is administered to successfully treat patients suffering from mental disorders. As such the same compounds are delivered to the same patient population for the same purpose. For these reasons it is the position of the Examiner that the treatment methods of the '730 patent would inherently increase the patients serotonin levels. For these reasons the claims are rejected.
